

ENSIVAL MORET SERVICES CHILE

A global approach to customer support has always been a priority for **Ensival Moret**.

With this in mind, and as a reinforcement of our partnership with customers in Chile, **Ensival Moret** just created a service center in Antofagasta offering a full range of services and adapted to repair and overhaul pumps from all types and marks, as well as spare parts manufacturing with customer's guarantee and specifications.

Thanks to its long experience in the pumps design and manufacturing as a know worldwide supplier and leading partner in mining and other difficult and specific pump applications, **Ensival Moret** can also propose additional services to support its customers like commissioning service, predictive and preventive maintenance plans which ensures maximum availability.

Our team can also provide any specific adaptations, modifications and improvements (hydraulic and mechanical) as well as reconstruction or re-engineering of parts and assistance 24 hours a day.

That new step will ensure a more efficient support of **Ensival Moret** to its customers for the entire life-cycle of its pumping installation.
